

We're starting out by printing the most famous computing phrase of all time! In the editor below, use either `printf` or `cout` to print the string ***Hello, World!*** to `stdout`.

240701072

Input Format

You do not need to read any input in this challenge.

Output Format

Print ***Hello, World!*** to `stdout`.

Sample Output

Hello, World!

Answer: (penalty regime: 0 %)

	Expected	Got	
✓	Hello, World!	Hello, World!	✓

Passed all tests! ✓

This challenge will help you to learn how to take a character, a string and a sentence as input in C.

240701072

To take a single character **ch** as input, you can use `scanf("%c", &ch);` and `printf("%c", ch)` writes a character specified by the argument `ch` to `stdout`:

```
char ch;  
  
scanf("%c", &ch);  
  
printf("%c", ch);
```

This piece of code prints the character **ch**.

Task

You have to print the character, **ch**.

Input Format

Take a character, **ch** as input.

Print the character, ***ch***.

Answer: (penalty regime: 0 %)

Ace editor not ready. Perhaps reload page?

Falling back to raw text area.

```
#include<stdio.h>
int main()
{
    char ch;
    scanf("%c",&ch);
    printf("%c",ch);
    return 0;
}
```

```
1 #include<stdio.h>
2 int main()
3 {
4     char ch;
5     scanf("%c",&ch);
6     printf("%c",ch);
7     return 0;
8 }
```

	Input	Expected	Got	
✓	C	C	C	✓

Passed all tests! ✓

The fundamental data types in c are int, float and char. Today, we're discussing int and float data types.

The printf() function prints the given statement to the console. The syntax is printf("format string",argument_list);. In the function, if we are using an integer, character, string or float as argument, then in the format string we have to write %d (integer), %c (character), %s (string), %f (float) respectively.

The scanf() function reads the input data from the console. The syntax is scanf("format string",argument_list);. For ex: The scanf("%d",&number) statement reads integer number from the console and stores the given value in variable ***number***.

To input two integers separated by a space on a single line, the command is scanf("%d %d", &n, &m), where ***n*** and ***m*** are the two integers.

Task

240701072

Your task is to take two numbers of **int data type**, two numbers of float data type as input and output their sum:

1. Declare **4** variables: two of type int and two of type float.
2. Read **2** lines of input from stdin (according to the sequence given in the 'Input Format' section below) and initialize your **4** variables.
3. Use the **+** and **-** operator to perform the following operations:
 - o Print the sum and difference of two int variable on a new line.
 - o Print the sum and difference of two float variable rounded to one decimal place on a new line.

Input Format

The first line contains two integers.

The second line contains two floating point numbers.

- $1 \leq \textit{integer variables} \leq 10^4$
- $1 \leq \textit{float variables} \leq 10^4$

Output Format

Print the sum and difference of both integers separated by a space on the first line, and the sum and difference of both float (scaled to **1** decimal place) separated by a space on the second line.

Sample Input

10 4
4.0 2.0

Sample Output

14 6
6.0 2.0

Explanation

When we sum the integers **10** and **4**, we get the integer **14**. When we subtract the second number **4** from the first number **10**, we get **6** as their difference.

When we sum the floating-point numbers **4.0** and **2.0**, we get **6.0**. When we subtract the second number **2.0** from the first number **4.0**, we get **2.0** as their difference.

Answer: (penalty regime: 0 %)

Ace editor not ready. Perhaps reload page?

Falling back to raw text area.

```
#include<stdio.h>
int main()
{
    int a,b;
    float c,d;
    scanf( "%d%d" ,&a,&b );
    scanf( "%f%f" ,&c,&d );
    printf( "%d %d\n" ,a+b, a-b );
    printf( "%.1f %.1f" ,c+d, c-
d );
}
```

```

int a,b;
float c,d;
scanf( "%d%d" ,&a,&b );
scanf( "%f%f" ,&c,&d );
printf( "%d %d\n",a+b, a-b );
printf( "%.1f %.1f",c+d, c-
d );
}

```

	Input	Expected	Got	
✓	10 4 4.0 2.0	14 6 6.0 2.0	14 6 6.0 2.0	✓
✓	20 8 8.0 4.0	28 12 12.0 4.0	28 12 12.0 4.0	✓
